4,000 Instant Millionaires & The \$1.75 Trillion IPO:

The New Trans-Cosmic Rocket Railroad Unifying Central Florida with the Launch Coast

FOR IMMEDIATE RELEASE: June 11, 2026

ORLANDO / CAPE CANAVERAL, FL — As SpaceX finalizes the largest IPO ever, ahead of its historic \$1.75 TRILLION Nasdaq debut tomorrow (Ticker: SPCX), attention shifts to why Florida remains especially positioned to enjoy the planet's largest resulting economic boost.

While Wall Street and national media obsess over the staggering \$75 BILLION raise, they completely overlook the hyper-convergence on the ground. Space strategist, systems architect, and defense innovation expert Robert S. Katz, CEO & Executive Director of World Innovation Network (WIN), stand-by for live or taped commentary to analyze the immediate Florida region ripple effects. Katz, the pioneer who predicted the inevitable convergence of Outer-Space (Launch), Cyber-Space (Comms), and Neural-Space (AI), remains ready with expert local insight.

> Rockets as Roadways & Railways - Boosters as Bridges & Boats:

Every major economic era and empire in human history was unlocked and unleashed by a transportation revolution—from Roman roads to transatlantic ships to transcontinental railroads. Friday's IPO is not about hardware; it's about forging and funding the physical trade routes of the 21st century. Starship is not just a spaceship — it is the new roadway. The reusable boosters returning to our coast are not just tech milestones. Instead, they represent the new bridges unlocking an entirely new global economy.

> Space "Sister-Sector" Synergy > Orlando's Simulation & Kissimmee's Semiconductors

The "lego pieces" of the future economy have already been built in Florida for years—just waiting for the connectivity of convergence. This IPO acts as the ultimate catalyst, fusing Orlando's undisputed global capital of Modeling, Simulation, and Training (MS&T) with Kissimmee and Palm Bay's expanding semiconductor surges. Through WIN's "Cradle-to-Commercialization Catapult" framework, this creates a hyper-streamlined Sister-Sector Synergy to position Central Florida as the absolute epicenter of the global space supply chain.

> Galactic Gold Rush: Real Estate, Defense, & "Towering Over the Towers"

National media misinterprets the xAI integration as a software play. In reality, it is a physical infrastructure boom that allows orbital AI to "tower over the towers." As Katz predicted over 10 years ago, by uniting Outer-Space (launch), Cyber-Space (Starlink's mesh), and Neural-Space (xAI compute), we are effectively "cutting the terrestrial cord," bypassing earth-bound energy and connectivity shackles. Locally, this convergence requires intensive SOLUTIONneering, driving a historic rush for new centers, spaces, and students, integrated directly to serve our beloved U.S. Space Force Guardians of Patrick Space Force Base and Cape Canaveral Space Force Station.

> Three Civilizational Shifts with a Single Bell Ring

This market debut triggers a triumphant trifecta. It is our Sputnik Moment for national security, our Internet Moment for global infrastructure, and our iPhone Moment for AI convergence. It represents a hyper-acceleration of "ScienceFACTion," transforming mere visionary theory into a public commodity within a single trading day.

> 4,000 New Space Millionaires Instantly & A Place in Space for Every Face

The wealth generation breaks beyond Silicon Valley or Wall Street. We are about to witness thousands of 'Space Millionaires' minted instantly, a massive concentration of whom live and work right here. This capital influx realizes one of Katz's core philosophies: "**There is a place in space for every face,**" empowering local talent from advanced manufacturing trades to K-12 pipelines throughout Florida.

EXPERT AVAILABLE FOR INTERVIEWS:

WHO: Robert S. Katz, CEO & Executive Director, World Innovation Network (WIN)

WHAT: Live In-Studio, Remote, On-Camera Stand-Up Field Interview

WHERE: Viera / Melbourne / Cape Canaveral / Launch Coast / Orlando Region (Also Zoom)

WHEN: ANYTIME based on Publication, Taping, and Live-Broadcast Deadlines

MEDIA CONTACT:
Robert S. Katz
